

Vo Minh Khang

Front-end Developer

 leaser019 |  Võ Minh Khang |  My Portfolio |  vomkhang35@gmail.com |  0888032465

Summary

I am a Computer Science student passionate about creating innovative solutions. I enjoy tackling challenges with smart, user-friendly solutions. Let's discuss how technology can add value to your project.

Education

2021 - Present Bachelor of Computer Science at **International University - VNU**
Relevant Coursework: Data Structure and Algorithms, Object-Oriented Analysis and Design, Digital Logic Design, Software Engineering, Computer Networks, Principles of Programming Languages, etc.

Work Experience

UNIT Technology Corporation Jul 2024 - Sep 2024

As a Frontend Developer Intern at UNIT, I gained valuable experience working on internal company projects, enhancing my skills in MUI, React Hook Form, and Redux. This role provided hands-on learning in modern front-end technologies and allowed me to apply them effectively in real-world scenarios.

AIoT Lab Vietnam, HCMIU Sept 2023 - Present

As a member of AIoT Lab Vietnam, I've gained hands-on experience in IT projects, strengthening my skills in web development, IoT, problem-solving, and teamwork, preparing me for future challenges.

Projects

DOTKEPLER APPLICATION September 2024 - December 2024

- **Description:** An application that streamlines project management and boosts team collaboration with efficient task tracking and real-time communication.
- **Technologies:** ReactJS, ExpressJS, MongoDB, Redis.
- **Responsibilities:** Designed intuitive UI/UX in Figma and built a full-scale React application with responsive, reusable components that can be used in multiple positions, implementing efficient data caching to enhance performance and reduce redundant requests.
- **Repositories:**  [DotKepler Client - Frontend](#) —  [DotKepler Server - Backend](#)

GIFT SHOP MOBILE APP March 2024 - May 2024

- **Description:** The project introduces modern technologies like MongoDB and Express.js and demonstrates effective mobile app development with React Native. It also emphasizes the importance of collaboration within a large team, a crucial skill in software development.
- **Technologies:** Javascript, React Native, NodeJS, ExpressJS, MongoDB.
- **Responsibilities:** Developed CRUD functions for server entities, ensuring data integrity and security within the database, and wrote and executed test cases for functions and APIs.
- **Repositories:**  [Gift Shop Mobile Application - Frontend](#) —  [Gift Shop Server - Backend](#)

Skills

Programming	Java, Python
Web Development	HTML, CSS, JavaScript, ExpressJS, Node.js, ReactJS
Database	MySQL, MongoDB.
